

I'm not robot!

Updated: 08/16/2021 by Computer Hope Alphabet may refer to any of the following: 1. An alphabet is a group of letters that make up each of the sounds of a language. With the English language, the alphabet contains letters "A" through "Z." With computers, the alphabet is stored as ASCII and allows the computer to display text and interact with the user. The alphabet also helps with sorting and finding information by sorting data in alphabetic order. Computer alphabet letter meanings Many different alphabet letters may have alternative meanings when dealing with a computer. For example, the letter "C" may describe the C programming language or the C: drive letter. If you're looking for the meanings of a specific alphabetic letter, click the letter in the list below. A B C D E F G H I J K L M N O P Q R S T U V W X Y Z Note The letters J, P, Q, V, and Z are not included in the list above, as they do not have any special meaning with computers. How many alphabet keys On the keyboard, there are the same amount of alphabet keys as letters in the language. With English there are 26 alphabet keys. Tip For information on why the keyboard keys are not in alphabetical order see our QWERTY page. How many keys are on a computer keyboard? See our computer dictionary for an A to Z list of computer terms. You can use our free online text tool to sort alphabetic ascending or alphabetic descending. 2. Alphabet, Inc. is a technology company founded in 2015 by Larry Page and Sergey Brin. It's the corporate parent of other companies, including Google LLC. For more information, see our Alphabet company and contact information. Alphabetic, Number, Phonetic alphabet, Typography terms Looking for free Russian worksheets? Here at the Linguajunkie blog, you'll find a nice collection of Russian worksheets and Russian PDF workbooks that are meant for beginners. They're free as a good starting step in your language journey. Of course, I do suggest getting a Russian language program later, but first let's do worksheets. How to download these Russian worksheets and workbooks. Click on the images below to download the PDFs. You can also right click and "save as" to save the PDFs to your device Remember, since these are worksheets, you need to print out and write on them to do the "work" and get the most out of these. If you download but don't use them, you're never going to learn any Russian. So, keep that in mind — nothing happens if nothing is done. And you want to speak Russian one day, right? 1. Russian Worksheets for the Alphabet If you're a beginner... Then you need to learn the Russian alphabet so you can read and write in Russian. Luckily, it's not too far from the English alphabet although there are some differences — especially with pronunciation. And you'll need to get used to them. So, download this Russian worksheet and practice the alphabet. 2. Russian Worksheets for Greetings After you learn the alphabet, what's next? It's time to start practicing writing. And why not start with the must-know basics — how to say hello in Russian or how to say bye in Russian. This Russian worksheet/workbook will help you master the common greetings. By the time you're done writing them out, you'll know them like the back of your hand. 3. Bundle of 14+ Russian Worksheets If you're looking for some professionally made worksheets... Here's a bundle made by RussianPod101, a popular Russian learning system. Inside, you'll find 14+ printable Russian workbooks and worksheets covering topics like verbs, adjectives, phrases for ordering food, and much more. Also, if you're looking for a Russian learning program, I can recommend them as well. So, click on the image below to grab the bundle and check them out. 4. Russian Numbers & Number Phrases Workbook Do you know how to count in Russian? No? Well, this writing workbook teaches you Russian numbers AND Russian number-related phrases. Phrases like, "how old are you," "I am ___ years old," "My phone number is..." and so on. Definitely a very useful workbook to get once you're done with the Alphabet worksheet above. 5. 25+ Russian Love Phrases Workbook You know what's fun to learn? Love words and phrases. So, if you're learning Russian because of someone you like, this is a good resource to have. Inside, you'll get 25+ words and phrases like how to say I love you in Russian. Then, your job is to print out resource and practice writing the words on the spaces below. It's that simple. 6. 50+ Russian Conversational Phrases What else is fun to learn? Conversational phrases. Phrases you will use in conversations with native speakers. And even though you're learning and writing with these worksheets, you will remember them because you've practiced them writing them out. This collection of Russian worksheets teaches you 50+ phrases like... how to introduce yourself in Russian, talk about the weather, your plans, and much more. 7. Top 100 Russian Words You should also learn the most common words. These words will give you a solid base of Russian and help you move forward. Again, just print out this Russian PDF workbook and practice writing them out. 8. 50 Most Common Russian Adjectives Here's another useful vocabulary boost. This Russian workbook teaches you the most common adjectives. 50 is plenty for a beginner. As usual, print it out and go to town writing in it. 9. 50 Most Common Russian Nouns Aside from adjectives, it's also good to know nouns. So, this small worksheet will do just that. Also, 50+ inside which is plenty of words for a beginner. Why Learn with Russian Worksheets & Workbooks? The reasons are simple. You get a chance to practice your Russian. You remember Russian better through practice (filling out the worksheets). You get to speak fluently later... because you've practiced. You'll never learn simply by "listening" or "reading about things." You have to DO things. It's like learning to dance without actually trying to dance — you simply won't learn! The fact is... you can read and listen to things all day long... But, you will NEVER learn Russian... And you will NEVER learn to use it freely and speak it freely like your very own language... if you don't actually do work — practice writing and speaking. Hence, worksheets give you a good opportunity to remember what you've learned and write things out. Doing this — using the words and writing them — will help you remember them better. So that later, you can freely use them while you're speaking Russian. An alphabet is made up of the letters of a language, arranged in the order fixed by custom. Adjective: alphabetic. The basic principle of alphabetic writing is to represent a single sound (or phoneme) of a spoken language by a single letter. But as Johanna Drucker notes in *The Alphabetic Labyrinth* (1995), "This phonetic writing system is at best an approximation. The orthography of English, for instance, is notoriously plagued by inconsistencies and peculiarities." "In about 1500 B.C., the world's first alphabet appeared among the Semites in Canaan. It featured a limited number of abstract symbols (at one point thirty-two, later reduced to twenty-two) out of which most of the sounds of speech could be represented. The Old Testament was written in a version of this alphabet. All the world's alphabets descend from it. After the Phoenicians (or early Canaanites) brought the Semitic alphabet to Greece, an addition was made that allowed the sounds of speech to be represented less ambiguously: vowels. The oldest surviving example of the Greek alphabet dates from about 750 B.C. This is, via Latin and give or take a few letters or accents, the alphabet in which this book is written. It has never been improved upon." (Mitchell Stephens, *The Rise of the Image, the Fall of the Word*. Oxford University Press, 1998) "The Greek alphabet was the first whose letters recorded every significant sound element in a spoken language in a one-to-one correspondence, give or take a few diphthongs. In ancient Greece, if you knew how to pronounce a word, you knew how to spell it, and you could sound out almost any word you saw, even if you'd never heard it before. Children learned to read and write Greek in about three years, somewhat faster than modern children learn English, whose alphabet is more ambiguous." (Caleb Crain, "Twilight of the Books." *The New Yorker*, Dec. 24 & 31, 2007)"The Greek alphabet ... is a piece of explosive technology, revolutionary in its effects on human culture, in a way not precisely shared by any other invention." (Eric Havelock, *The Literate Revolution in Greece and Its Cultural Consequences*. Princeton University Press, 1981) "While the alphabet is phonetic in nature, this is not true of all other written languages. Writing systems ... may also be logographic, in which case the written sign represents a single word, or ideographic, in which ideas or concepts are represented directly in the form of glyphs or characters." (Johanna Drucker, *The Alphabetic Labyrinth*. Thames, 1995) "English has had two different alphabets. Prior to the Christianization of England, the little writing that was done in English was in an alphabet called the futhorc or runic alphabet. The futhorc was originally developed by Germanic tribes on the Continent and probably was based on Etruscan or early Italic versions of the Greek alphabet. Its association with magic is suggested by its name, the runic alphabet, and the term used to designate a character or letter, rune. In Old English, the word run meant not only 'runic character,' but also 'mystery, secret.'"As a by-product of the Christianization of England in the sixth and seventh centuries, the English received the Latin alphabet." (C.M. Millward, *A Biography of the English Language*, 2nd ed. Harcourt Brace, 1996) "The dual alphabet—the combination of capital letters and small letters in a single system—is first found in a form of writing named after Emperor Charlemagne (742-814), Carolingian minuscule. It was widely acclaimed for its clarity and attractiveness, and exercised great influence on subsequent handwriting styles throughout Europe." (David Crystal, *How Language Works*. Overlook, 2005) "If thou be desirous (gentle Reader) rightly and readily to understand, and to profit by this Table, and such like, then thou must learne the Alphabet, to wit, the order of the Letters as they stand, perfectly without booke, and where every Letter standeth; as b near the beginning, n about the midstest, and t toward the end." (Robert Cawdrey, *A Table Alphabeticall*, 1604) "Educational television ... can only lead to unreasonable disappointment when your child discovers that the letters of the alphabet do not leap up out of books and dance around with royal-blue chickens." (Fran Lebowitz) "Writers spend three years rearranging 26 letters of the alphabet. It's enough to make you lose your mind day by day." (attributed to Richard Price)Dr. Bob Niedorf: Name as many mammals as you can in 60 seconds. Ready? Go. George Malley: Hmm. 60 seconds. Well, how would you like that? How about alphabetical? Aardvark, baboon, caribou, dolphin, eohippus, fox, gorilla, hyena, ibex, jackal, kangaroo, lion, marmoset, Newfoundland, ocelot, panda, rat, sloth, tiger, unicorn, varmint, whale, yak, zebra. Now varmint is a stretch; so is Newfoundland (that's a dog breed); unicorn is mythical; eohippus is prehistoric. But you weren't being very specific, now, were you, Bob?Dr. Bob Niedorf: Well! Ahh, I'll, uh—I'll try to be more specific.(Brent Spiner and John Travolta, *Phenomenon*, 1996) EtymologyFrom the Greek, alpha + beta Pronunciation: AL-fa-BET
